spaces

What We Do?

Education needs a serious review, not only in terms of “what to learn” but also, “how to learn”.

That's where we pitch in!

We work with colleges across Maharashtra.

MSFDA believes that the larger purpose of education is to develop thoughtful, well-rounded and creative individuals & society (NEP 2020).

The values get reflected in each of our programmes:

- Experiential learning, creativity and innovation
- Learning beyond knowledge
- Multidisciplinary education
- Diversity and inclusion
- Scientific temperament and rational thinking

How Do We Do?

MSFDA aims to transform the higher education landscape, through continuous professional development of teachers and other stakeholders across Maharashtra through:

- District level orientation to listen, learn and orient
- Engagement with management, leaders, officials, teachers, administrative staff, students
- Institutional approach for process-based intervention with colleges
- Collaboration with academic/professional organisations for cross-sharing of best practices
- Alumni programmes to form a community for continuous support and learning
