

## CODE OF ETHICS FOR RESEARCH & PUBLICATION WORK

To improve quality of Publication our Institute suggested some Guidelines & made policy for Authors in the form of Code of Ethics as follows-

- 1] Research work should be Unique. There should be no duplication of work.
- 2] The research work should be published in reputed journals as listed on UGC website
- 3] Journal should have Unique ISSN & ISBN number that reflects authenticity of Journal.
- 4] Research Papers published in private in-house journals, proceedings of workshops, seminars, refresher/orientation are having very little weightage as research publication
- 5] Research Papers should be Published in reputed journals like Scopus, Web of Science, Science Direct, Springer , IEEE transaction. & UGC approved Journals & articles in Magazines
- 6] Publications of Papers should not be published in Fake Journals having weekly publication without peer reviewing . Such Publishers are having Fake Impact Factor & h index & it should be avoided.
- 7] Duplication of research work, idea, plagiarization & manipulation of data should be avoided
- 8] Research papers should be scanned through Plagiarism softwares before publishing. As many Open source Plagiarism software's are available online to do the same should be used at least.
