**7. AUTOMOTIVE INDUSTRIAL TRAINING**

**Teaching Scheme:**

**Examination Scheme:**  
Term Work: 25 marks

**COURSE LEARNING OUTCOMES:** After completion of the course, the student shall be able to:

- Express the techniques observed during training
- Explain applications of advanced tools & techniques
- Describe daily routines, rules followed during working in industry

The student has to undergo Automotive Industrial Training of minimum Two Weeks in summer vacation, after T.E. (Automobile) - II, in an automotive / auto component manufacturing industry. Each student has to prepare a report on industrial training of about 25 pages of "A4" size sheets in single bound copy.

An assessment of his training will be done based on the quality of the work & preparation and understanding of the candidate.

Format for the report:

- Title sheet
- Department certificate
- Training certificate signed by industry authority
- Industry profile (Organization structure, Layout, functioning etc.)
- Manufacturing/Testing processes
- List of machineries with emphasis on special purpose machines
- Daily reports signed by competent industrial authority
- Training outcomes

(Note: Concern project guide should assess & sign the certificate)

B.E. (Mechanical Engineering) Semester VII

**6. INDUSTRIAL TRAINING**

Examination Scheme:

Term Work: 50 Marks

**Course Objective:**

The course aims to:

1. Familiar the students to realize an industrial work.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Comprehend the knowledge gained in the course work
2. Create, select, learn and apply appropriate techniques, resources, and modern engineering tools.

**Industrial Training**

The students have to undergo an industrial training of minimum two weeks in an industry preferably dealing with Mechanical engineering during the semester break after Sixth semester and complete within 15 calendar days before the start of seventh semester. The students have to submit a report of the training undergone and present the contents of the report before the evaluation committee constituted by the department. An internal evaluation will be conducted for examining the quality and authenticity of contents of the report and award the marks at the end of the semester.

It is expected that students should undertake small assignment or work related to any of the course related aspect. Report is based on compilation of work carried out related to facility and layout planning, Industrial engineering- time study and motion study, Line efficiency evaluation and improvement, Process capability evaluation, Industrial automation, Process or machinery modification as identified.

**Industrial Training Report Format:**

Maximum fifteen students in one batch, involving three groups of maximum five students, shall work under one Faculty. The same group shall work for project under the same guide. However, each student should have different industrial training and its presentation.

The report should be of 20 to 30 pages. For standardization of the report the following format should be strictly followed.

1. Page Size: Trimmed A4
2. Top Margin: 1.00 Inch
3. Bottom Margin: 1.32 Inches
